15,000m<sup>2</sup> of building land in Salinas with water - electric close. We are proud to offer this lovely plot of land with great views, and only a short walk to the village of Salinas. With water on site, and electricity very close (waiting on quotes for installation), this is an ideal investment for your new home. In Salinas, you can build up to 2% of the land size, per floor (up to 2 floors), so this would be large enough for a 620m<sup>2</sup> property.
